

Pfizer UK Undergraduate Programme 2026/2027

Global Regulatory Policy & Intelligence Undergraduate

Pfizer Research and Development (PRD)/Global Regulatory Science (GRS)

Global Regulatory Policy & Intelligence – Europe/International Regulatory Policy

Who can apply?

Applicants **must** be completing a placement as part of a degree course at a UK University, either through Year in Industry/Industrial Placement or Gap Year.

Please note that we will only consider candidates who have applied by completing the Pfizer Placement Application Form. Candidates who do not complete and attach the application form will NOT be considered. You can download the Word version of the Application Form here: [Undergraduate Vacancies | Pfizer UK](#) and find instructions as to how to complete your application and more about eligibility criteria.

To learn more about this exciting opportunity, please see below!!

Department Overview

The Global Regulatory Policy and Intelligence team is accountable for monitoring changes in the external regulatory environment worldwide. The team also coordinates and drives Pfizer's response to these changes. Discussions with internal colleagues specialising in affected areas, ranging from clinical development to digital technologies, allows the regulatory policy team to develop a point of view, which Pfizer uses during discussions with regulators (e.g. the EU Medicines Agency, US FDA, China Regulatory Authority) and colleagues from other pharmaceutical companies. The Undergraduate positions are based Sandwich or Walton Oaks, UK.

What can I achieve and what will I be accountable for whilst completing a placement at Pfizer?

During the year the Undergraduate has accountability for:

- Monitoring and analysing changes in the regulatory environment, identifying important trends and assessing the potential impact of these on Pfizer.
- Presenting at meetings to advise on key issues and their potential impact (e.g. conducting clinical trials for new medicines, opportunities to accelerate the development of new medicines, strengthening regulatory systems and pathways).

- Working with teams to develop and agree the Pfizer view on key issues, to provide material for future activity.
- Provide input to the development of strategies and plans aimed at influencing the external regulatory environment.
- Identifying opportunities where Pfizer points of view can be used externally.

The regulatory environment is complex and constantly changing so you will need to be able to manage multiple issues and deliver to time and quality standards.

During the year, you could also expect to gain:

- A year's opportunity to work in a high priority area within the company in a small, highly dedicated team that develops and uses Pfizer's influence to aid the development of medicines.
- A broad comprehension of the role of regulatory affairs and the regulatory environment and how they impact the discovery, development and marketing of pharmaceuticals
- Appreciate how different departments across Pfizer interact to work towards common goals
- Specialist knowledge of regulatory issues and an appreciation of Pfizer's role in the external environment.
- Being part of a team that helps to deliver new products as speedily as possible to where they are needed - the patients.

What other opportunities and benefits do Pfizer offer?

There will be many opportunities to interact face-to-face and virtually (via Webex, teleconference, etc) with Pfizer colleagues around the world. There will also be opportunities for interaction with people working on similar issues in other pharmaceutical companies.

When can I start?

Placements will start on 1st September 2026 and will run for 12 months.

PERSON SPECIFICATION

Type of person we are looking for, in relation to '**Skills**', '**Knowledge**' and '**Motivation**':

- Completing placement as part of University Degree either through Year In Industry/Industrial Placement or Gap Year
- On target for a Degree Classification
- Good communication and social skills
- Ability to build networks and alliances
- Comfortable working on their own and in a wide range of team roles
- Can view issues from different angles and can project future impacts
- Willing to challenge
- Can analyse and summarise complex data into simple messages
